CLA+FAC+TSR			425,00 €	500,00 €	25,00 €	29,75 €
Shutter speeds records and diagrams (PDF and/or printout)			4,20 €	5,00 €		

Issue: Shutter straps tearing

With age, the shutter straps often lose their tensile strength and are unable to withstand the sudden braking force they are subjected to at the end of the shutter curtain movement. Cleaning and lubricating increases the peak load of the shutter movement as the 'natural' brake effect of old grease has been eliminated. As a result, it is not uncommon for the straps of the second curtain to tear during adjusting after cleaning and lubricating.

Therefore, from now on the two straps of curtain 2 will be replaced in any case – as part of the CLA without additional charge.
